

Venue Tech / Bio Rex

Venue Tech / Bio Rex

Do you want to increase the impact of your event and provide your guests with a technically advanced event with the help of skilled technicians?

In addition to the basic technical equipment, Rex Events can also provide a high level of event technology.

For each event, it is possible to tailor the technical implementation to the nature and needs of the event. We can also provide you with, for example, streaming services, band or DJ sound systems according to your requirements.

Each additional element in the packages is also available for hire separately. Please note that the prices are indicative.

The rental of the foyers and any other services required (museum visits, guided tours, other staff) will always be quoted separately.
